

The Impacts of Climate Change in Africa

by Real World Radio
Thursday, 24 July 2008

Climate change is a global phenomenon that affects different populations around the world in different ways. In South Africa, for example, there are situations caused by global warming, as in the rest of the African continent.

Siziwe Khanyile, member of environmental organization GroundWork, Friends of the Earth South Africa, talked about this.

Here are the words of the activist.Â
