

# New â€˜Biodiversity offsetting, making dreams come trueâ€™ mockumentary

by Carbon Trade Watch  
Thursday, 10 July 2014

Biodiversity offsets justify the destruction of irreplaceable ecosystems to make way for mining projects, motorways and pipelines to name a few. Europe is the new frontier for biodiversity offsets. The European Union is considering new legislation that permits biodiversity offsets. Tell the EU that nature is not for sale by responding to their public consultation before 17th October 2014. Sign our open statement atÂ naturenotforsale.org/

Biodiversity offsetting makes dreams come true. It is the license that can make bad developersâ€™ dreams a reality. Across the world offsets already justify the destruction of irreplaceable ecosystems to make way for mining projects, motorways, pipelines to name a few. Europe is the new frontier for biodiversity offsets. The European Union is considering new legislation that permits biodiversity offsets. Tell the EU that nature is not for sale by responding to their public consultation before 17th October 2014.

Las compensaciones de biodiversidad consiguen que los sueÃ±os se hagan realidad. Son la licencia que puede hacer que los sueÃ±os de las compaÃ±Ã-as que desarrollan malos proyectos se hagan realidad. Las compensaciones ya se estÃ¡n usando en todo el mundo para justificar la destrucciÃ³n de ecosistemas irreemplazables para proyectos mineros, autopistas, oleoductos etc. Europa es la nueva frontera para las compensaciones de biodiversidad. La UniÃ³n Europea estÃ¡ estudiando nuevas leyes para darles luz verde. Dile a la UE que la naturaleza no estÃ¡ en venta respondiendo a su consulta pÃ³blica antes del 2 de octubre de 2014.Â
